

In second-line NSCLC, the ADC wins are all biomarker-selected

No ADC has beaten chemo on OS in all-comers, and the one OS win was biomarker-selected

Antibody-drug conjugates in second-line NSCLC

OS win vs chemo OS / primary miss Approved on ORR (no OS win)

ALL-COMER 2L+ NSCLC, vs docetaxel - no ADC has won on overall survival

Latest: missed OS, Jun 2026

ASSET	ADC TARGET	SELECTION	TRIAL	OUTCOME
Sigvotatug vedotin	integrin β 6	all-comer	SigVie-002	OS missed
Datopotamab deruxtecan	TROP2	all-comer	TROPION-Lung01	OS missed (co-primary)
Sacituzumab govitecan	TROP2	all-comer	EVOKE-01	OS missed (p=0.0534)

BIOMARKER-SELECTED POPULATIONS - mixed, and where the only wins are

ASSET	ADC TARGET	SELECTION	TRIAL	OUTCOME
Sacituzumab tirumotecan	TROP2	EGFR-mutant	OptiTROP-Lung03	OS win vs docetaxel (China)
Patritumab deruxtecan	HER3	EGFR-mutant	HERTHENA-Lung02	OS missed (vs platinum, withdrawn)
Tusamitamab ravtansine	CEACAM5	CEACAM5-high	CARMEN-LC03	Discontinued (PFS miss)
Trastuzumab deruxtecan (Enhertu)	HER2	HER2-mutant	DESTINY-Lung02	Approved on ORR
Telisotuzumab vedotin (Emrelis)	c-Met	c-Met-high	LUMINOSITY	Approved on ORR
Datopotamab deruxtecan (Datroway)	TROP2	EGFR-mutant	TROPION-Lung01/05	Approved on ORR

Source: competitive-intelligence analysis of antibody-drug conjugate pivotal/registrational readouts in previously-treated NSCLC. All-comer trials vs docetaxel (SigVie-002, TROPION-Lung01, EVOKE-01) missed overall survival. Biomarker-selected results are mixed: sacituzumab tirumotecan beat docetaxel on OS in EGFR-mutant NSCLC (OptiTROP-Lung03; OS secondary; China-approved) while patritumab deruxtecan missed in the same setting. Enhertu, Emrelis, and Datroway are accelerated approvals on response rate in biomarker niches, not survival. Full trial list and sources in the accompanying dataset.
